Height 55 inches  
Diameter 10 inches  
Tare Weight 50 LBS  
Total 150 LBS when 80% full

240 LB Cylinder  
Height 49 inches  
Diameter 15 inches  
Tare Weight 80 LBS  
Total 272 LBS when 80% full

1000 LB Cylinder  
Height 57 inches  
Diameter 30 inches  
Tare Weight 350 LBS  
Total 1150 LBS when 80% full

## Recovered Refrigerant Buy Back

Use dedicated recovery cylinders for each type refrigerant, and clean the equipment and hoses when switching between refrigerants to avoid mixing. We will pick up your full recovery cylinders, we take all sizes, and return them clean, in a deep vacuum, and ready for use.

Or, we'll swap your full recovery cylinders with certified, clean, in a deep vacuum cylinders ready for use. On the swap out program, if your cylinders need to be certified, we charge for this service one time only. If needed we also paint and replace valves and handles for nominal fees.

## Cylinder Certification

Cylinders are certified for 5 years. The date will be stamped on the rim of the cylinder, sidewall, or under the cap next to the valve.

There is no limit on the lifetime of a recovery cylinder - as long as the cylinder passes a hydrostatic test, not just a visual test, it can safely be used.

Some cylinders stamp the retest date but all cylinders will have the manufactured stamp date, so make sure you are looking at the right one.

## Shipping Cylinders

Band or shrink wrap cylinders securing them to a pallet. If you do not have a forklift or loading dock, we can request a truck with a lift gate.

Twelve 50 LB cylinders will fit on one layer of a pallet – proceed with second layer

Twenty 30 LB cylinders will fit on one layer of a pallet – proceed with second layer

Twelve 125 LB cylinders can be laid down and stacked on a pallet

Trigon Refrigerant will arrange for shipping. Bills of Lading will be faxed to you – sign and keep one for your records and give one to the driver.

One shipping label will be faxed to you to affix to the shipment.
